Xiaomi Corporation

Type of Engagement: Annual Review  
Date: June 07, 2022  
Engagement Team: Mahesh Krishnamoorthy, mahesh.krishnamoorthy@sustainalytics.com  
Anirban Sengupta, anirban.sengupta@sustainalytics.com

Introduction

In 2021, Xiaomi Corporation (Xiaomi) issued a green bond aimed at financing projects that reduce Xiaomi’s carbon footprint and improve the environmental impact of the Company. In 2022, Xiaomi engaged Sustainalytics to review the projects funded through the issued green bond and provide an assessment as to whether the projects met the Use of Proceeds criteria and the Reporting commitments outlined in the Xiaomi Corporation Green Finance Framework.¹ Sustainalytics has provided a second-party opinion² on the Framework in July 2021.

Evaluation Criteria

Sustainalytics evaluated the projects and assets funded with proceeds from the 2021 green bond based on whether the projects and programmes:

1. Met the Use of Proceeds and Eligibility Criteria outlined in the Xiaomi Corporation Green Finance Framework; and
2. Reported on at least one of the Key Performance Indicators (KPIs) for each Use of Proceeds criteria outlined in the Xiaomi Corporation Green Finance Framework.

Table 1 lists the Use of Proceeds, Eligibility Criteria, and associated KPIs while Table 2 lists the detailed findings.

Table 1: Use of Proceeds, Eligibility Criteria, and associated KPIs

<table>
<thead>
<tr>
<th>Use of Proceeds</th>
<th>Eligibility Criteria</th>
<th>Key Performance Indicators (KPIs)</th>
</tr>
</thead>
</table>
| Eco-efficient and Circular Economy Adaptable Products, Production Technologies and Processes | Expenditures related to Research & Development (R&D) of products to achieve energy efficiency and to be certified by the China Energy Label (CEL), China Energy Conservation Product Certification (CECP), and European Union Energy Label  
  - Reduction in energy and water consumption, as well as GHG emission  
  R&D expenditures related to facilitating the use of eco-efficient materials in its products and packaging, including but not limited:  
  - Designing product packaging to reduce packaging material usage and weight and to reduce/avoid the adoption of plastic and film materials by utilizing biodegradable paper |  
  - CO₂ (or other GHG) emissions avoided (metric tons of CO₂e)  
  - Total packaging materials reduced (metric tons)  
  - Total plastic and film materials avoided/reduced (metric tons) |

<thead>
<tr>
<th>Category</th>
<th>Description</th>
<th>Metrics</th>
</tr>
</thead>
</table>
| **Energy Efficiency**    | Design, installation, development and operation of infrastructure that reduce energy consumption or avoid GHG emission in operations, including but not limited to:  
  - Design and development of energy-efficient infrastructures that enable unmanned production and achieve 24-hour lights out production  
  - Improvement and maintenance of energy-saving electrical appliances controlled by a smart energy management system |  
  - Energy savings in MWh  
  - CO₂ (or other GHG) emissions avoided (metric tons of CO₂e)                                                                                                                          |
| **Green Buildings**      | Expenditures related to (1) improvement or refinancing of existing and (2) design or construction of new, office space, commercial buildings, or surrounding communities certified in accordance with any one of the following selected certification systems:  
  - Chinese Green Building Evaluation Label (GBL) – Two stars or above  
  - U.S. Leadership in Energy and Environmental Design (LEED) – Gold or above  
  - Building Research Establishment Environmental Assessment Model (BREEAM) – Excellent or above  
  - BCA Green Mark – Gold or above |  
  - Annual energy savings (kWh)  
  - CO₂ (or other GHG) emissions avoided (metric tons of CO₂e)  
  - Number and type of certification of green buildings  
  - Annual reduction in water consumption (metric tons)                                                                                                                                  |
| **Clean Transportation** | Expenditures related to investment in property, plant and equipment (PP&E), as well as R&D expenditures of alternative vehicles, sample projects including but not limited to:  
  - Electric vehicle  
  - Electric scooters and electric self-balancing scooters |  
  - CO₂ (or other GHG) emissions avoided (metric tons of CO₂e) in use phase per vehicle                                                                                                     |
| **Pollution Prevention and Control** | Promoting waste classification and instant waste conversion in order to mitigate its environmental impact  
  Recycling domestic waste and kitchen waste in offices to reduce solid waste disposal  
  - Installation and maintenance of waste processing equipment in Xiaomi Science and Technology Park canteen which converts kitchen waste into organic fertilizer in accordance with national standards |  
  - Amount of waste reused or recycled (metric tons or in % of total waste)  
  - Amount of waste treated in an environmentally sound manner (metric tons) from Xiaomi's facilities                                                                 |
| **Renewable Energy**     | Expenditures related to new or existing renewable energy projects (solar and wind projects) or the associated transmission solutions |  
  - Renewable energy generation (MWh) / capacity (MW)  
  - Renewable energy capacity installed (MW)                                                                                                                                                |
Issuing Entity's Responsibility

Xiaomi is responsible for providing accurate information and documentation relating to the details of the projects that have been funded, including description of projects, amounts allocated, and project impact.

Independence and Quality Control

Sustainalytics, a leading provider of ESG and corporate governance research and ratings to investors, conducted the verification of Xiaomi's Green Bond Use of Proceeds. The work undertaken as part of this engagement included collection of documentation from Xiaomi employees and review of documentation to confirm the conformance with the Xiaomi Corporation Green Finance Framework.

Sustainalytics has relied on the information and the facts presented by Xiaomi with respect to the Nominated Projects. Sustainalytics is not responsible nor shall it be held liable if any of the opinions, findings, or conclusions it has set forth herein are not correct due to incorrect or incomplete data provided by Xiaomi.

Sustainalytics made all efforts to ensure the highest quality and rigor during its assessment process and enlisted its Sustainability Bonds Review Committee to provide oversight over the assessment of the review.

Conclusion

Based on the limited assurance procedures conducted, nothing has come to Sustainalytics’ attention that causes us to believe that, in all material respects, the reviewed bond projects, funded through proceeds of Xiaomi's Green Bond, are not in conformance with the Use of Proceeds and Reporting Criteria outlined in the Xiaomi Corporation Green Finance Framework.

---

1 Sustainalytics limited assurance process includes reviewing the documentation relating to the details of the projects that have been funded, including description of projects, estimated and realized costs of projects, and project impact, which were provided by the Issuer. The Issuer is responsible for providing accurate information. Sustainalytics has not conducted on-site visits to projects.
Appendices

Appendix 1: Allocation Reporting by Eligibility Criteria

In July 2021, Xiaomi Corporation issued a Green Bond, with the net proceeds to be USD 392.8 million. As of April 2022, Xiaomi has allocated 45.13% of the net proceeds, and intends to complete full allocation within the third year of the issuance. Of the eligible categories, 63.82% of the allocated net proceeds were used to finance new projects, while 36.18% were used to refinance existing projects. The table below provides a detailed break-up of the allocation of net proceeds category-wise.
